Subject: Fun with Electrical Towers - and a seriously improved model

Dear All – You may enjoy seeing this creative and progressive approach to electrical towers “across the pond”. (Site appropriate design? Involving design professionals? What a concept!!!)

<http://www.theguardian.com/environment/gallery/2011/sep/14/shortlist-designs-electricity-pylons-in-pictures>

The link takes you to an article that shows ***all of the top entries***, in addition to the winner **which is now being installed**.

I also had feedback from one RACC member that he had difficulty opening the .pdf documents sent in the second mailing to Friends and Members of RACC. If any of you had, or hear of, similar problems, would you please let me know?

David has now posted the information on RACC’s website, which I’ve tested and is working, so it is now accessible at:

http://rockbridgeconservation.org/current_projects.php

with links to Kris’s *terrific* research and analysis.
